## Land Development Engineer/Surveyor

Newton Survey is an established and well-respected land surveying consultancy based in Richmond, Nelson. We carry out a wide range of projects including rural, rural/residential, urban infill and multi-lot subdivisions in and around the Nelson and Tasman region. Due to ongoing growth, we are looking for an experienced Land Development Engineer/Surveyor to join our friendly and collaborative team.

Applicants will ideally be confident in all facets of land development projects, including engineering design, storm water and waste water reticulation design, planning, contract supervision and legal survey. Experience in AutoCAD Infrastructure Design Suite would be an advantage, but not essential. We are looking for someone possessing exceptional interpersonal communication skills who enjoys seeing a project through from beginning to end and who understands that client satisfaction is a key component of how our company operates.

Based in our Richmond office, Newton Survey offers flexible hours, a supportive working environment and ongoing professional training. There is an opportunity for future purchase into the business for the right candidate.

Nelson is a very desirable place to live and work, well known for it's great weather, outdoor pursuits, food, wine and general lifestyle.

Enquiries and applications will be dealt with in strictest confidence. Please contact Paul Newton on 027 4787839, or email [paul@newtonsurvey.co.nz](mailto:paul@newtonsurvey.co.nz)
