

Senior Geodetic Surveyor

Apply your experience undertaking surveys using geodetic marks and data to help deliver a world-class geodetic system for New Zealand

The Senior Geodetic Surveyor takes a leading role in maintaining and extending New Zealand's survey control networks. You will build strong relationships with the private sector surveyors who undertake most of the geodetic fieldwork and analysis, ensuring that all work meets required standards, validating and integrating it into LINZ databases. You will also organise and lead field surveys, sharing your expertise with less experienced members of the team.

In a time of rapid technological change, you will help shape the strategic direction of New Zealand's geodetic system, ensuring that it meets regulatory requirements as well as the evolving needs of surveyors and other users.

Key selection criteria includes:

- Substantial field experience in geodetic or cadastral surveying, as well as processing/analysing/presenting the data collected in such surveys
- Strong technical knowledge of New Zealand's cadastral system and its relationship with the geodetic system
- Proven ability to build and maintain relationships with surveyors and other spatial professionals who are key users of the geodetic system
- Self motivation to find, develop and apply new technical skills
- Proven ability to successfully mentor and coach others in this specialist area

At Land Information New Zealand (LINZ), we underpin New Zealand's success with information about 'where' – that is, location information. From the best way to develop farm land, build a new suburb, manage a high country farm or navigate on land or at sea, our work and location information help people make better decisions and create economic, social, environmental and cultural value for New Zealand.

Click on the link below in order to be directed to our online careers website. You may view a position description at this site, as well as complete the online application, and upload a CV and cover letter. We are looking for evidence of how you meet each of the key selection criteria.

[18/081 Senior Geodetic Surveyor, Location Information, Wellington \(Open Term\)](#)
